

Data Management for the Advancement of AM Technology Readiness

28 October 2020

Brandon D. Ribic, PhD.

Technology Director, America Makes

Brandon.Ribic@ncdmm.org

Overview

The three core activities of the Institute are:

- **Develop Additive Manufacturing Technology:**
Projects, Innovation, Technology Transfer, Implementation
- **Accelerate Human Capital Development:**
Workforce, Education, Training, Outreach
- **Maintain Collaborative Ecosystem:**
Government, Membership, Community

These focus areas are enabled by:

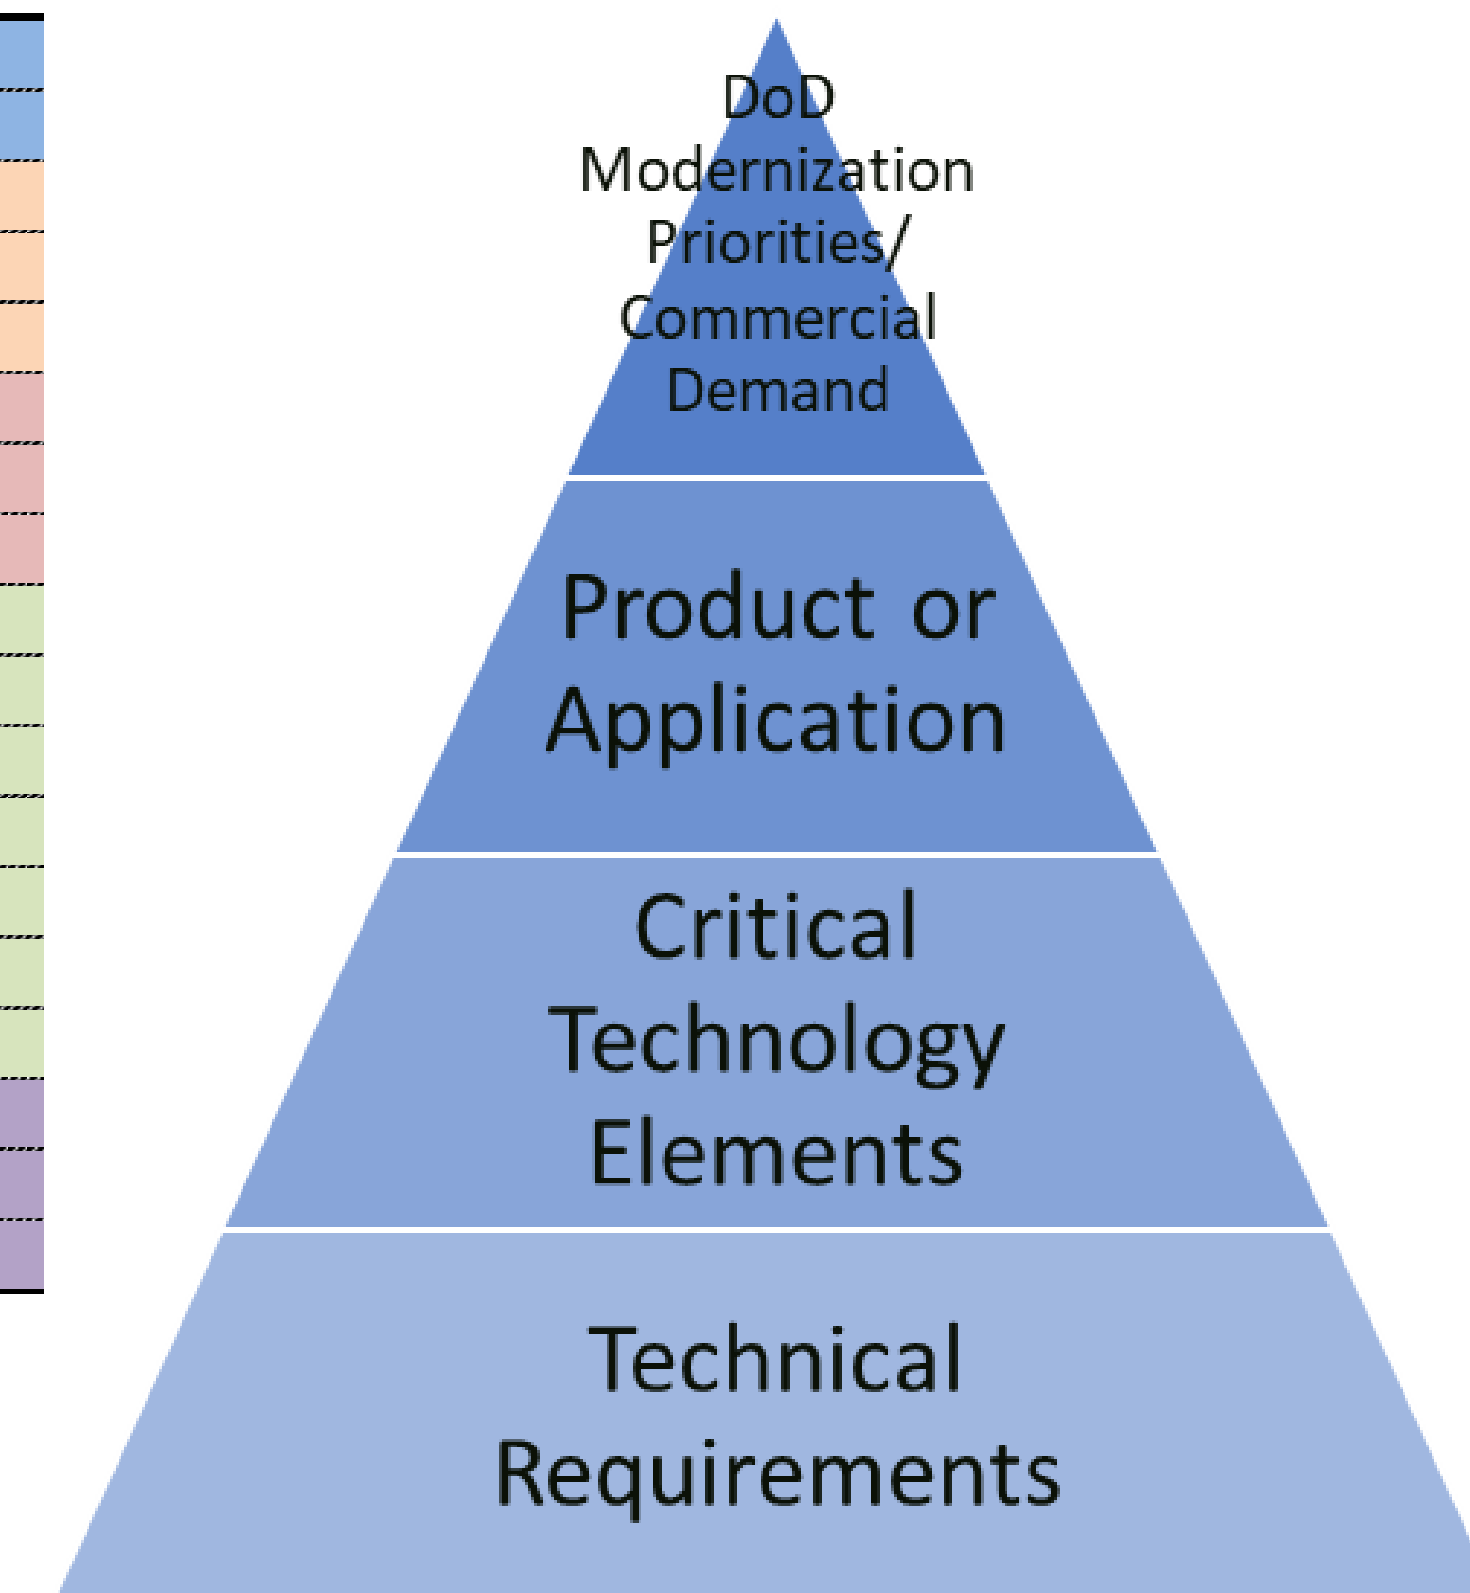

- **Operations:** Run by a not-for-profit organization with a lean and collaborative structure
- **Technology:** A dynamic advanced manufacturing technology including the core AM technologies as well as supporting technologies like the digital thread, standards, etc.
- **Communications:** Spreading the word to government, members, stakeholders, community

Collaboration Drives Our Strategic Focus

- Focus and strategy is documented within the Technology Roadmap
 - Application/process agnostic
 - Informed by not only end users
- Multitude of interconnected technical considerations
 - TRL 4-7
 - Address risk and maturation
 - Assess performance/function
- Roadmap is a data model
 - Integral to institute operation
 - Connects research efforts to roadmap taxonomy
 - Identifying needs/opportunities
 - Charting progress
 - Organizes lessons learned

Swimlane	CTE
Design	Bio-Inspired Design & Manufacturing
Design	Product & Process Design Aides/Apps
Material	Material Property Characterization
Material	Next-Gen Materials
Material	Additive Manufacturing Tech Data Packages
Process	Multi-Material Delivery & Deposition Systems
Process	Next-Gen Machines
Process	Process Temperature Gradient Control
Value Chain	Advanced Sensing & Detection Methods
Value Chain	Cost & Energy Driver Analysis/Modeling
Value Chain	Digital Thread Integration
Value Chain	Intelligent Machine Control Methods
Value Chain	Rapid Inspection (Post-Build)
Value Chain	Repair Technologies
Value Chain	Standards/Schemas/Protocols
AM Genome	Benchmark Validation Use Cases
AM Genome	Model-Assisted Property Prediction
AM Genome	Physics-Based Modeling & Simulation

Addressing Technology Gaps to Strengthen Domestic Supply Chain

Finding and Accessing Data

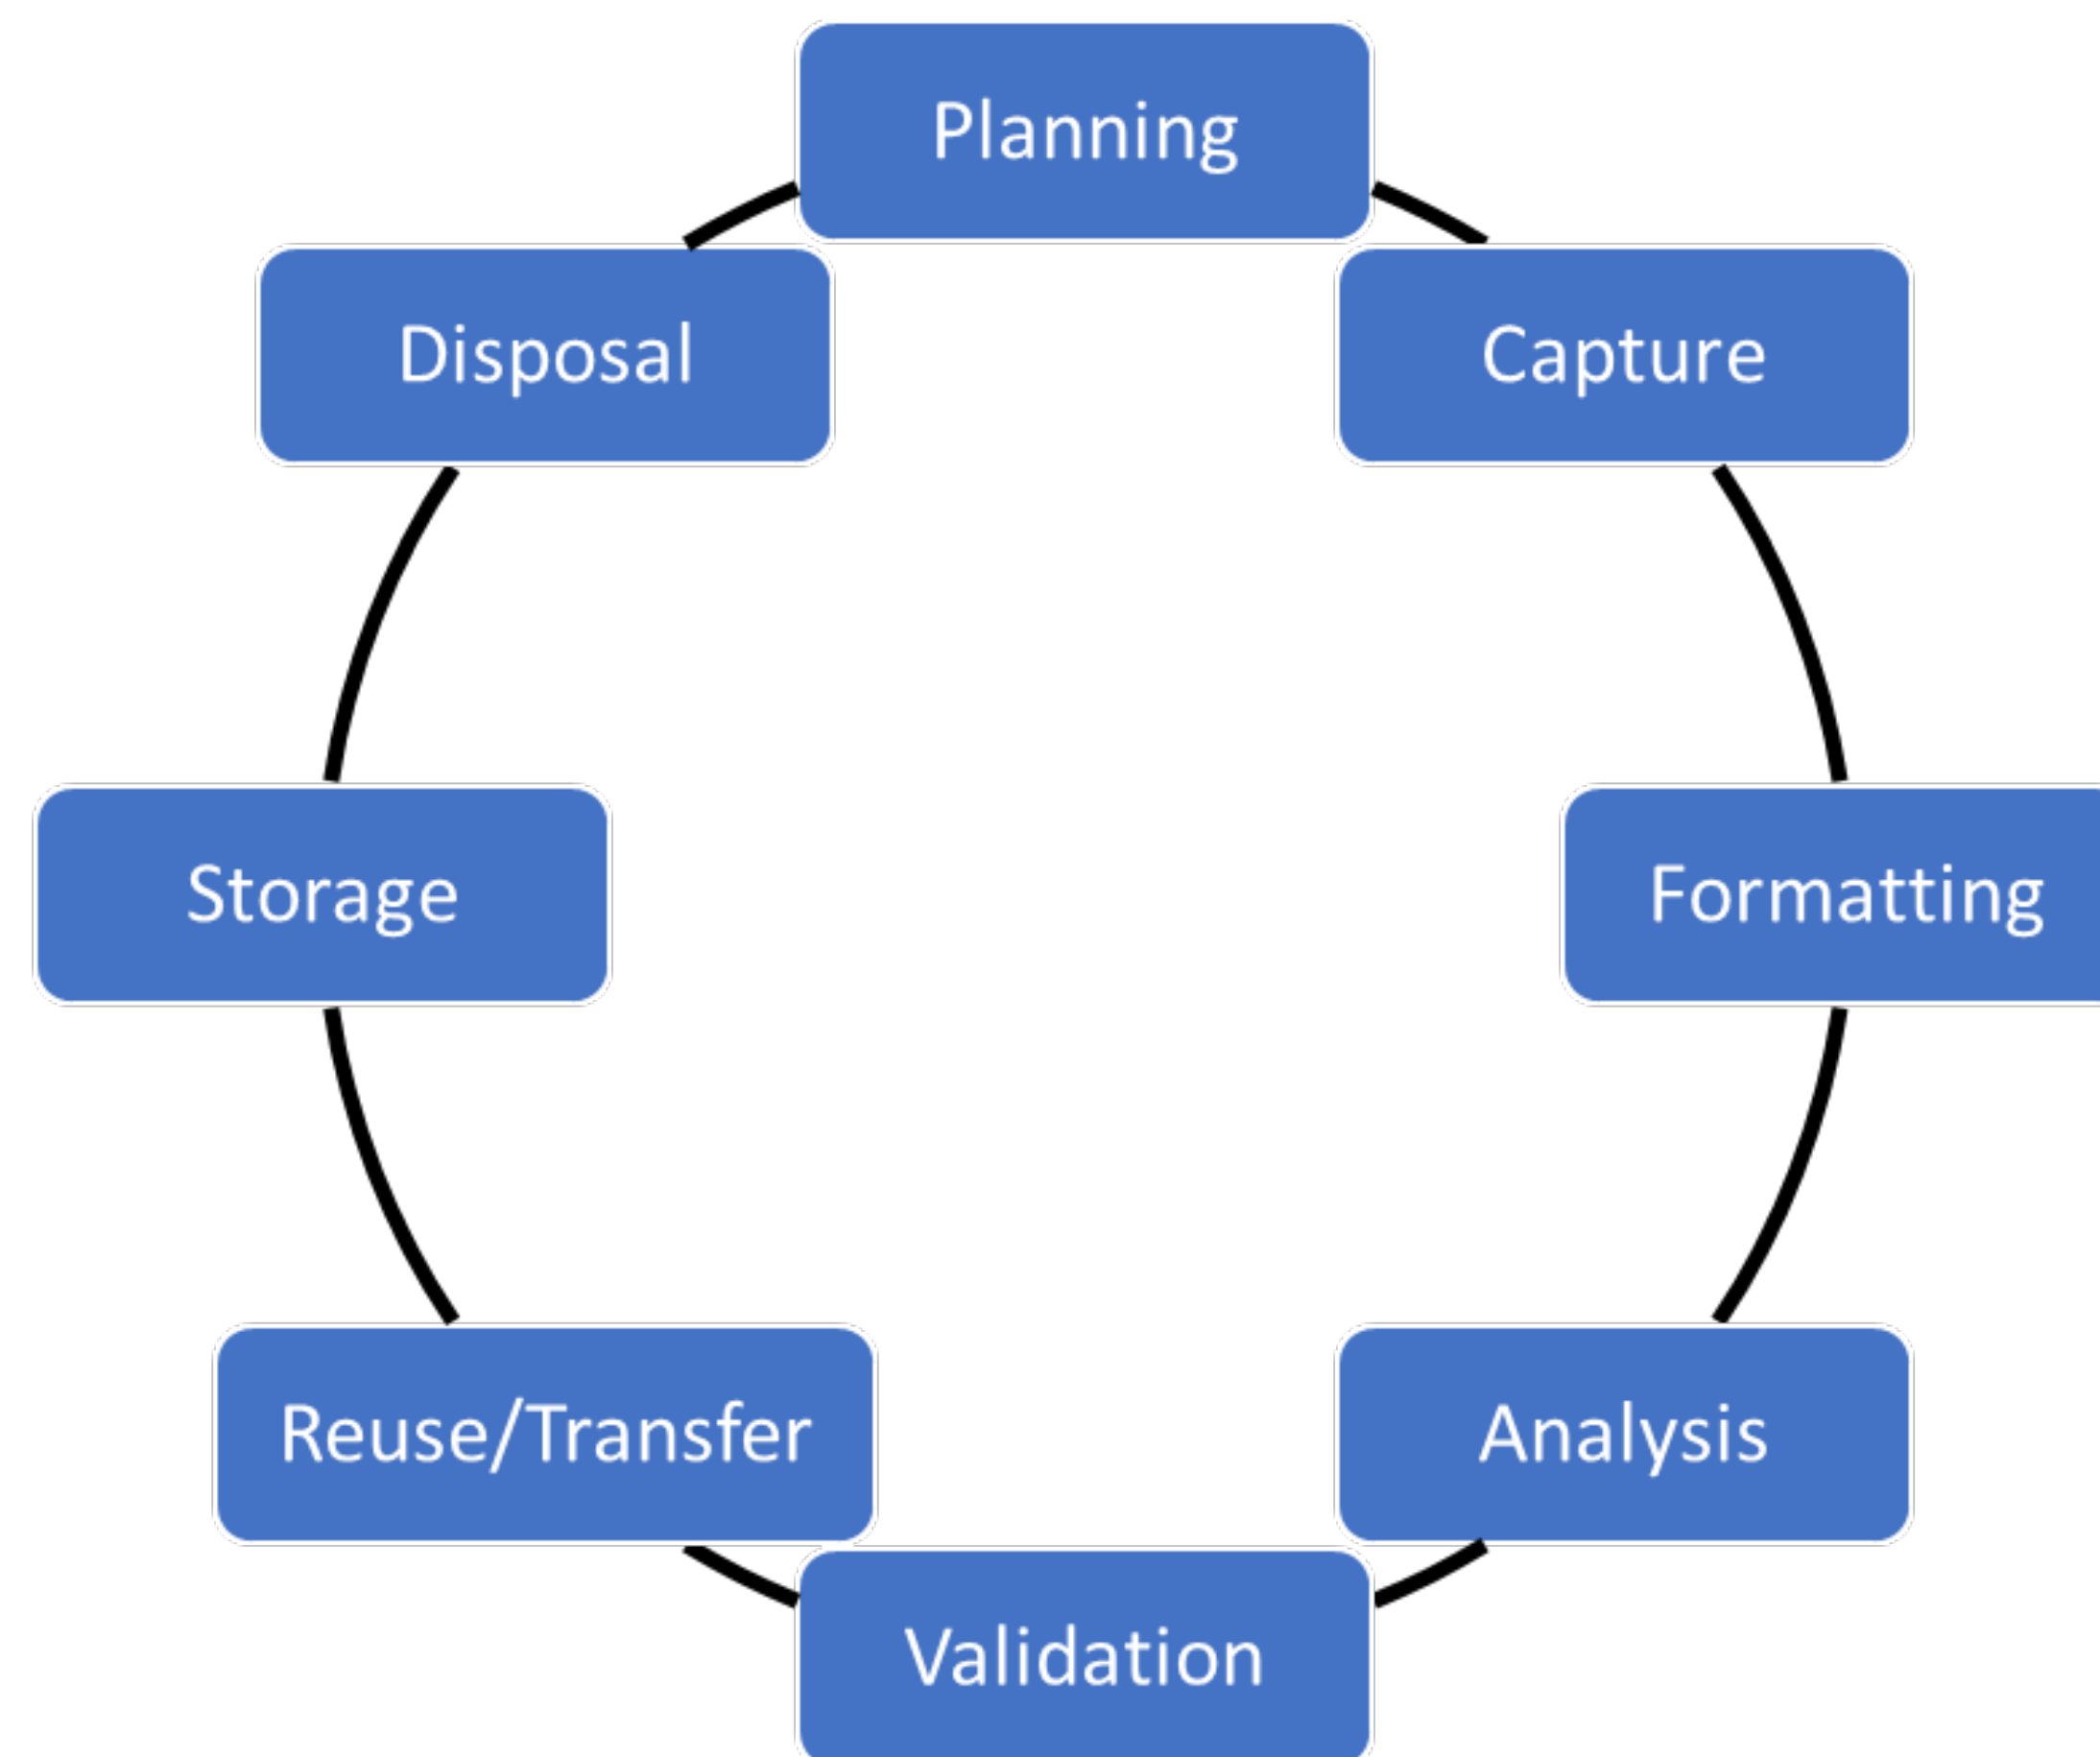

- The America Makes Digital Storefront is an online repository to share information across the community
 - Data, methods, lessons learned, and best practices
 - Searchable singular source
 - Organized according to the role it serves in executing the technology roadmap

- 5 key attributes included with each search return item
 - Project title
 - Organization
 - Process
 - Material
 - Equipment make/model

Project/Program Data Life Cycle

- Facilitated by
 - Value Assessment – Goals/Significance
 - Tools
 - Training
 - Methods
 - Standards/Specifications/Work Instructions
 - Security and auditing
- Recognized (reuse/interoperable) by
 - Planning – structure (pedigree)
 - Transfer
 - Storage

Heightened Focus on Data Management

- Value proposition is critical
 - We are actively exploring this question
- Technology development transitioning focus from feasibility to repeatability, transferability, efficiency
 - Representative of TRL >4 and driving towards 6/7
- New considerations – cultural shift
 - Data management
 - Alignment of effort and deliverables to roadmap taxonomy
 - KPP's – success measures
 - Transfer of data to membership
 - Promoting engagement with technical community – consensus building
 - Opportunity to insure value, reuse, interoperability of outcomes
- Exploring opportunities to improve organization, storage, and sharing of datasets
 - Open project Call 2020
 - Rapid Innovation Call

Addressing Interoperable and Reusable Data

- Good opportunity space
 - Education, conversation, prioritization, development, and standardization
- Well aligned to efforts observed in standards domain
 - Systematic assessment of reliable methods, tools, data
 - ASTM CoE
 - ASTM Data Subcommittee
 - SAE Additive Manufacturing Data Consortium
 - ASME Verification and Validation in Computational Modeling and Simulation Committee
- 2019 Data Management and Schema Workshop
 - Common Data Dictionary
 - Common data exchange format
 - Automated data acquisition
 - Public use cases
 - Minimum viable data package
- Opportunity to transfer, reuse, and exploit process/measured/materials data
 - Need to understand pace and cost
 - ML/AI, monitoring/modeling, database development, data acquisition, cybersecurity

Summary

- Data management is a relevant and important component to AM technology maturation
- ~95% of the standards gaps within the AMSC roadmap can benefit or rely on data management
- Opportunity to benefit endeavors which address statistical significance and validation
- Expectations remain positive for accelerating supply chain efforts in AM technology maturation
- Stands to considerably benefit education and workforce
 - Content for training and accreditation
- Pursuit of data management value proposition
 - Applications with strong end user demand
 - Demonstrate transferability enabled by good data management practices
