

AFFILIATE SOCIETIES:

Within your ASM International membership, you also have the opportunity to join an ASM Affiliate Society. ASM Affiliate Societies were founded to meet specific technical interests and needs of our membership. Each society provides educational, event, and service opportunities focused on a particular material and process.

ELECTRONIC DEVICE FAILURE ANALYSIS SOCIETY (EDFAS)

Focusing specifically on the reliability, testing, and failures of circuits, semiconductors, and other electronic platforms, EDFAS Fosters education and communication in the failure analysis community. Their mission is to work for the technology advancement and the improved performance and reliability of devices and materials for the electronics industry.

HEAT TREATING SOCIETY (HTS)

The world's premier membership society dedicated to the advancement of heat treating as a theoretical and applied discipline. HTS focuses on thermal processing of metals and materials. Members leverage this network of professionals to share technical information, industry knowledge, best practices, and to recognize outstanding achievements and distinguished performance of fellow members.

INTERNATIONAL METALLOGRAPHIC SOCIETY (IMS)

IMS serves members who are involved in the examination, analysis, characterization, structure, and evaluation of metals and other materials. By joining, members have access to this close-knit network of metallographers, failure analysts, and microstructure experts.

SHAPE MEMORY AND SUPERELASTIC TECHNOLOGIES (SMST)

The foremost authority on the technical properties and uses of Nitinol and other shape memory alloys. Members are dedicated to disseminating technical education on the unique class of materials which exhibit shape memory and superelastic properties. SMST offers access to a key network of organizations and professionals who comprise the core of the world's knowledge and understanding of these amazing materials.

THERMAL SPRAY SOCIETY (TSS)

The leading global source for thermal spray information dedicated to the expansion of knowledge, technical information, safety guidelines, and best processes and procedures in this unique and valuable surface application. With an unparalleled international community and network, TSS members have access to a global marketplace that continues to grow.

FAILURE ANALYSIS SOCIETY (FAS)

Serves the needs of its members and the worldwide Failure Analysis community by facilitating educational opportunities, promoting the development of professional relationships, and diffusing knowledge to advance the field of failure analysis and prevention. FAS is dedicated to advancing the important role failure analysis plays in the materials science industry.

Membership Benefits Guide

LEARN MORE:

Designed, with your success in mind. ASM International strives to bring the greatest benefits and information to its members. Whether you are a student, an emerging or seasoned materials science professional, or a corporate leader, there's a place for members of every interest and stage of career in materials sciences.

Learn more about the exclusive member benefits that ASM membership provides to material science professionals by visiting **www.asminternational.org** or calling ASM Member Service Center at 440-338-5151.

Welcome to the growing
community of ASM International!

ASM International is the preeminent association for engaging and connecting materials professionals and their organizations to the resources necessary to solve problems, improve outcomes, and advance society.

As the world's largest and most established materials information society, ASM International unites you to a global network of peers and provides access to trusted materials science information.

ASM INTERNATIONAL MEMBER BENEFITS:

REFERENCE MATERIALS

Take advantage of member discounts to popular reference materials, such as databases, charts, evaluations, ASM Handbooks®, and more.

FREE ONLINE JOURNALS

Receive full-text access to years of Metallurgical and Materials Transactions A, B & E, plus 10 other highly respected journals.

ASM DESK EDITIONS ONLINE

Find authoritative answers you need on properties, processing, analysis, and testing. Get free access to Materials Handbook and Engineered Materials Handbook, a \$600 value.

ADVANCED MATERIALS & PROCESSES

Enjoy a free subscription to ASM's award-winning magazine. Available in both print and digital versions.

ASM CONFERENCES

Save on registration with member exclusive discounts, while increasing your technical knowledge, exposure to industry leaders, and networking opportunities.

ASM EDUCATION

Keep your technical edge and take advantage of member discounts on accredited education courses including seminars, onsite training, and online.

Wherever you are in your materials career, being a member of ASM International offers a number of benefits and resources to help you accomplish your personal and professional goals.

ASM MEMBER DIRECTORY

Access new colleagues and experts in your field for solutions and support.

GROUP DISCOUNT PROGRAM

Discover special pricing on services like insurance, magazines, shipping, and rental cars.

ASM CAREER CENTER

View new job opportunities to build your career or take the next step in your professional life. This tool is great for job seekers and prospective employers.

MY ASM

Create your individualized ASM portal to access materials news, topics of interest, email, and more.

ASM ARCHIVE

Research past projects with an extensive archive of ASM journals and magazines.

VOLUNTEER OPPORTUNITIES

Take an active role in the leadership of ASM International including chapters and affiliates.

ASM CHAPTERS, COMMUNITIES, AND AFFILIATES

Network with like-minded individuals at industry conferences, expositions, and social events.

GET INVOLVED AND STAY UP-TO-DATE:

VOLUNTEER

One of the most impactful ways of getting involved with ASM International is through volunteering. Volunteer and take an active role in the leadership of ASM to make a real difference in the next generation of materials scientists.

CHAPTERS

With more than 80 professional chapters, ASM International offers one of the most extensive networking options available. Local ASM Chapters provide opportunities for professional networking and development, social events, and rewarding volunteer activities.

CONFERENCES AND EVENTS

ASM International and affiliate society conferences and events connect you with the latest applied knowledge, solutions, and the audiences who care about your products and services. Meet face to face and build your professional network with like-minded material science professionals. Speak or present your paper and research at an ASM Conference for the opportunity to share your knowledge on an international scale.

ASM International and affiliate conferences are held annually and biannually all around the world:

AeroMat — Heat Treat — International Thermal Spray Conference (ITSC)

International Conference on Shape Memory and Superelastic Technologies (SMST)

International Symposium for Testing and Failure Analysis (ISTFA)

EDUCATION

ASM International offers several different education options to help you stay competitive in the materials science market. Take advantage of the special member pricing for hands-on classroom courses, online, and blended learning options. If you have a gap in knowledge or experience, visit our website to see if an education course is the right fit for you.

Teach a course or write and edit course material to share your knowledge for a larger impact on the materials community.
